CP255 - W3_S1 Loops and Conditionals Answer Key

Part 3: Tracing Through Loops (Try on your own) - Trace Table Exercise
Before running the cell, fill in the trace table.

```python
# Check your trace
numbers = [2, 5, 3]
result = 1

for num in numbers:
    print(f"Before: result = {result}, multiplying by {num}")
    result = result * num
    print(f"After: result = {result}")
    print()

print(f"Final: {result}")
```

Answer:

```python
numbers = [2, 5, 3]
result = 1

# Trace Table

# | Iteration | num | result (before) | result (after) |
# |-----------|-----|-----------------|----------------|
# | 1         | 2   | 1               | 2              |
# | 2         | 5   | 2               | 10             |
# | 3         | 3   | 10              | 30             |
```
